Al Rey Villagracia

has successfully completed the online, non-credit Specialization

Mastering DeepSeek.ai: From Fundamentals to Advanced Skills

This Specialization equips learners with the skills to build, integrate, and deploy AI-powered applications and intelligent agents using DeepSeek. Through hands-on projects, learners will explore real-world use cases, automate workflows with tools like n8n and Make.com, and implement advanced techniques such as embeddings, Retrieval-Augmented Generation (RAG), and task-based AI agents. By the end of the program, learners will be able to create scalable, production-ready AI solutions for automation, data processing, and enterprise applications.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
