Al Rey Villagracia

has successfully completed the online, non-credit Professional Certificate

Microsoft Data Visualization

By completing the Data Visualization Professional Certificate, you've gained skills in Microsoft Power BI to harness data for business decisions, making you a valuable asset to any organization. This certification prepares you for entry-level roles in data analytics and business intelligence. Throughout the program, you engaged with the content, activities, and assessments, mastering fundamental concepts such as: - Interpreting datasets and effectively communicating findings to stakeholders through Power BI visualizations. - Analyzing data to derive actionable insights. - Crafting interactive reports and dashboards. - Utilizing Data Analysis Expressions (DAX) for advanced data modeling. - Leveraging AI-driven tools and statistical techniques to uncover hidden insights and trends.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
